

LYNXLOG

DATA ACQUISITION MANAGEMENT SOFTWARE

LynXLog is the desktop software for the management of SL1 Data Logger.

Its main features are:

Data download interface

Data logging configuration (channels, triggers etc.)

Real-time view (Monitor Function)

System management (hardware info, power settings, etc.)

Track designer (Google Maps integration)

Software management (data conversion format, graphics, etc)

LynXLog can convert logger recorded data in various formats:

WinTAX

BLF*

CSV*

MDF*

MDF4*

Vector ASCII*
